HOW TO USE DATA, POSITIVITY RATE:

SN Routine testing- use positivity rate to determine the frequency of routine testing;

AL & SN- Indoor visits- use positivity rate to determine surveillance testing, if a community is doing it; allowance for communal dining and activities.

CASES PER 100,000: AL & SN- use cases per 100,000 to determine if they may allow indoor visitors and if visitor needs a COVID test. **GREEN: NO, YELLOW: YES**

Indoor visits are also dependent on the completion of baseline testing, call the community to find out their progress.

Key-

Positivity rate is rate of positive results of COVID-19 tests, taken from CMS; Cases per 100,000 is cumulative over two weeks, taken from CDPHE. **GREEN** indicates the lowest level, **YELLOW** the medium level and **RED** the highest level, as indicated by CMS and CDPHE.

COLOR RATING KEY:

POSITIVITY RATE: **Green**= <5%; **Yellow**= 5-10%; **Red**= >10%

CASE PER 100,000 RATE: **Green**= < or = 25; **Yellow**= 26-175; **Red**= >175
